

Video Trainer

With the help of the Ontario Trillium Foundation, CKMS is expanding its capabilities to include equipment for video streaming. We are looking for the right person to do the following.

Contract: April, May, June 2018 (~3 months), hours negotiable.

What You Do

- Train radio hosts in use of video streaming equipment through a regular workshop. Ensure that all radio hosts have access to the training. Track who has completed training.
- Self learn our video and computer setup and how to use it for video streaming.
- Determine best settings for cameras and other equipment.
- Determine, document and demonstrate work flows for video streaming that are intuitive and hard to screw up.

Experience and Skills aside from being responsible and professional

- Familiar with video equipment and how to set it up (frame rate, resolution, white balance, etc)
- Teaching or tutoring small groups with varying technical and artistic backgrounds.
- Familiar with good practice for shooting video (composition, light, multi camera)
